

PEOPLE MAP

- ▶ For this activity, invite students to think about a goal they would like to accomplish. Ask one or two students to share their goal with the class. Remind students that it is hard to accomplish a big goal if they try to do it alone.
- ▶ Using the diagram below, invite students to write their goal in the center box. Then ask students to think about the people they will need to take with them in order to achieve that goal.

- ▶ Close the activity by discussing the following questions:
 - Q Why is it important to take people with you as you set out to achieve big goals?
 - Q How can you remain open to new ideas and people to work with?
