

The Lead4Change program aligns seamlessly with the **Six Gifted Education Programming Standards.***

LEARNING AND DEVELOPMENT

The curriculum is intentionally designed to promote self-understanding, awareness of needs and cognitive and affective growth (Standard 1). In lessons like **Be Your Best Self** and **Be a Team of Avid Learners**, students are encouraged to identify their interests, strengths and gifts (1.1) while engaging in meaningful and challenging learning activities (1.5). See the table on the next page for specific standards alignment for each individual lesson.

ASSESSMENT

Lead4Change also offers many opportunities for formal and informal assessment throughout the program (Standard 2). The Leadership Survey, administered before and after Lead4Change, allows students to demonstrate important learning progress (2.5) as a result of participation in the program.

CURRICULUM PLANNING & INSTRUCTION

The Lead4Change curriculum is grounded in research-based models for learning and instruction (Standard 3). Throughout the program, students become more competent across many dimensions of learning (3.2) and their participation in a service project teaches students to be productive in a multicultural, diverse and global society (3.3).

LEARNING ENVIRONMENTS

Because Lead4Change is a leadership program that engages students in a group service project of their choosing, social responsibility and leadership skills are a natural result of participation (Standard 4). Throughout the project, students have multiple opportunities to establish positive peer relationships (4.2), use positive strategies to address social issues (4.4) and practice effective oral and written communication skills (4.5).

PROGRAMMING

Lead4Change is a comprehensive program that is systematically developed, evaluated and refined to ensure student outcomes (Standard 5). The project is intentionally designed to be collaborative and as students learn the power of bringing people with you, they consistently engage with families, the community and staff at the school (5.4). In addition, students have the opportunity throughout the program to identify skills they can apply to reach future career goals (5.3).

PROFESSIONAL LEARNING

Teachers involved with Lead4Change are provided many opportunities for development as educators (Standard 6). Lead4Change offers extensive support to teachers including alignment guides to national standards and encourages lifelong learning for both students and teachers (6.4).

Lead4Change is a high-quality, research-based program that has shown measurable student outcomes. With the many opportunities to engage in challenging curriculum that promotes the overall growth of students, it is an excellent choice for teachers of gifted children to supplement any academic program.
